

EXCLUSIVE FEATURES SET PRODIGY APART.

ENERGY EFFICIENCY

Prodigy ComfortFactor

A Comfortable Home Year-Round. Prodigy delivers outstanding all-weather protection and can reduce your energy costs, thanks to the exceptional R-value of its industry-leading thermal barrier – up to 1-1/2" thick insulation*, the thickest EPS foam available in a one-piece insulated siding system.

ThermoSphere™

With innovative features such as RigidLock and TrueForm, Prodigy creates a powerful blanket of insulation around your home. Most trim and accessories are also insulated to further reduce potential energy gaps.

ENGINEERED PERFORMANCE

TrueForm™

One-Piece Insulated Siding System. Precision-contoured insulation – up to 1-1/2" thick – bonds securely to the siding panel, creating an integrated system that delivers remarkable strength and energy efficiency.

RigidLock

Innovative locking mechanism features a tongue-and-groove coupling that seals the panels together and locks out air and moisture. This ensures your siding will be locked in, will have straight and even course lines, and will look great for a lifetime.

MonoWall Integrity™

Structurally Independent Wall System. Structural integrity and rigidly interlocking panels mean Prodigy stands tall on its own. The siding that stands on its own will stand up to almost anything.

INSPIRED BEAUTY

TrueCourse™

The Look of Hand-Installed Boards. Designed and expertly manufactured to capture the look of traditional single-plank siding. Available in 6" and 7" clapboard and 5" dutch lap profiles.

Extended Length

More Panel. Less Seams. 39% longer than a standard 12' panel, the Prodigy Extended Length panel design yields a straighter, cleaner exterior appearance and fewer overlaps.

TrueWoodLook

Crisp, Clean and Subtle. The look and feel of finely milled wood attracts admiration without seeking attention. The understated look is timeless and genuine.
