

# PELICAN BAY® ONE SHAKES AND SCALLOPS:

AUTHENTICALLY DETAILED FOR EXCEPTIONAL STYLE AND PERFORMANCE.

Four authentic cedar reproductions are designed by artisans and engineers to guarantee that each piece looks handmade. New technology and color selections work with all Alside siding profiles, creating endless design options.

Use Pelican Bay® One Scallops to highlight gables, window boxes and eave edges or to create frieze boards and bands to emphasize your home's style. Pelican Bay One Traditional Shakes, Hand-Split Shakes and Cape Cod Shingles are hand-crafted to bring the look of real cedar shake to your home – use to accentuate the architectural aspects of your home or to side your entire house.

When it comes to separating Pelican Bay One from real cedar – the distinction is in the performance. Pelican Bay One features durable polymer construction that won't crack, warp, rot or split and never needs to be painted. You'll have the natural beauty and appeal of genuine cedar but without the time-consuming maintenance.

These distinct qualities combined with the latest technology make Pelican Bay One an industry leader in design, appearance and performance.

## Pelican Bay One Shakes and Scallops Exclusive Features:

- **A Continuous Panel Lock** for a strong, secure fit resulting in a stable, consistent appearance.
- **An Extended Length** for less seams and a cleaner exterior appearance.
- **A Self-Concealing Seam Lock** for a flawless, classic look.
- **Gale Force 5 Technology** ensuring superior performance in extreme weather conditions. In independent tests, Pelican Bay One remained secure in Category 5 hurricane-velocity winds.
