

CHARTER OAK® XXL:

25' EXTENDED LENGTH REINFORCED SIDING

Bring out the beauty of your home with Charter Oak XXL reinforced premium vinyl siding. It's more than twice as long as standard siding, 25' to be exact. That means significantly fewer overlaps if any at all. And with fewer overlaps to see, there's much more beauty to appreciate.

Charter Oak XXL's extended length panels can be used on their own and in combination with our 16' 8" panels and standard 12' 1" panels to minimize or eliminate unsightly joints – the area where individual "board" lengths come together. And due to its superior rigidity, the course lines are straight and smooth. With Charter Oak XXL, the overall appearance is one of uniform, uninterrupted beauty.

Charter Oak XXL delivers performance in remodeling and new construction alike, with all the durability and strength of [Charter Oak®](#) for a faster, easier installation.
